DETAILED ACTION

1. This office action is in response to Applicants' amendment of 8/20/04.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to integrated circuitry boundary scan testing, classified in class 714, subclass 727.
- II. Claims 12-18, drawn to logic circuit testing, classified in class 714, subclass 724.

- 2.1 The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as use in **boundary scan testing** integrated circuitry. See MPEP § 806.05(d).

- 2.2 Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

- 2.3 No election was made during a telephone conversation with Brian Seidleck on 23 Dec. 2004.

- 2.4 Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
